

iZettle Supported Smartphones and Tablets (at 01/10/2014)

These are the devices (and Operative System versions) that we have tested and that we know work with iZettle. If your device (and OS version) isn't listed below, we can't guarantee that it will work. We are continuously testing and adding more smartphones and tablets to the list.

Please note that the Chip & PIN reader should work with most Android smartphones and tablets which have Bluetooth and an Internet connection, and where the iZettle app can be downloaded.

Model	OS	Chip & Signature reader	Chip & PIN reader
iPhone 6 Plus	iOS 6.1 or later	✓	✓
iPhone 6	iOS 6.1 or later	✓	✓

Please note that the Chip & PIN reader should work with most Android smartphones and tablets which have Bluetooth and an internet connection, and where the iZettle app can be downloaded.

This device is not supported with the Chip & PIN reader:

Samsung Galaxy Gio GT-S5660

Using iZettle on a device which has been jailbroken or rooted is prohibited
